

Acutronic Monsoon II & Mistral End of Life Statement

January 01, 2011

Dear valued Susquehanna Micro Customer:

This letter is to provide you with advance notice of the end of sales date and end of support date for the Acutronic Medical Systems AG, Monsoon II & Mistral high frequency jet ventilators. Since its release in early 2000 it has been a great product, which has been featured in many publishing. With the release of the new Monsoon III taking control of the market it has been decided to discontinue these 2 models. In addition Susquehanna Micro will continue with the best of our ability to maintain these units for 7 years. Providing the availability of some older parts that are becoming obsolete, this is 2 years longer than the traditional support window. Therefore, Susquehanna Micro will implement the following end of sales process:

Step One: Effective December 31, 2010

Susquehanna Micro will stop accepting orders for the Acutronic Monsoon II & Mistral Jet Ventilators. Supplies will be available till at least the end of service date "step 2"

Step Two: Effective December 31, 2017

Susquehanna Micro will discontinue any service and support for the Monsoon II & Mistral Jet Ventilators. As well, all parts for service, that are non- consumable will be removed from inventory and no longer be available. Parts will be available on a first come first serve basis until the effective date.

Addendum: November 15, 2013

As of December 31, 2014 all repair service on the Monsoon II and Mistral ventilators will cease! SMI will continue to provide annual PM on the units till the original cutoff date of December 31, 2017 so long as they only need PM kits to pass the inspection!

Susquehanna Micro advises that you make arrangements prior to the end of service to upgrade your unit to the new and updated Monsoon III. So to provide better, safer and more accurate care for your patients for many years to come!

Thank you for your continued support. If you have any questions or need additional information, please do not hesitate to contact our office @ 888-730-5463. Information on the new Monsoon III can be found @ <http://www.susquemicro.com>

Best regards,

Scott Keller
Vice President, SMI
